1. Choose the correct modal verb.
The level of detail in each command _____be significantly greater
A) should to
B) able to
C) is able
D) could
E) have
2. Choose the correct modal verb.
In more complex systems, the number of commands _____be quite large
A) able to
B) could
C) can to
D) ought
E) may to
3. Choose the correct modal verb.
So the controller would be _____ calculate how the output is different from the required value
A) able to
B) ought
C) able
D) will
E) to be able to
4. Choose the correct modal verb.
An unauthorized person with access to this information _____use it for blackmail
A) ought be
B) was able to be
C) could
D) might be
E) shall be
5. Choose the correct modal verb.
The operator ____ to control the device
A) have
B) are able
C) ought
D) can
E) should
6. Choose the correct modal verb.
Partial automation _____ include automation of control operations
A) ought
B) have
C) are able
D) has to
E) might to
7. Choose the correct modal verb.
The plant operators _____ to control the implementation of partial automation
A) shall
B) will
C) should
D) might
E) ought
8. Choose the correct modal verb.
Partial automation _____ be found to be most effective in inaccessible places
A) should to
B) will to

C) may to
D) is to
E) might to

9. Choose the correct modal verb.

As automation equipment is perfected, its range of application _____ be expanded

A) can
B) will to
C) might to
D) may to
E) am able

10. Choose the correct modal verb.

According to the plan working production equipment _____ be partially automated

A) ought to
B) may to
C) will to
D) are able
E) could to

11. Choose the correct modal verb.

The driver _____ permanently monitor the system and be prepared to take over control at any time

A) may to
B) am able
C) must
D) will to
E) could to

12. Choose the correct modal verb.

Simple automatic devices _____ effectively replace human labor

A) could to
B) ought
C) can
D) should to
E) is able

13. Choose the correct modal verb.

The inaccessibility ... be the complexity or rapidity of the process

A) are able
B) could to
C) will to
D) may
E) might to

14. Choose the correct modal verb.

We _____ imagine our life without the great inventions

A) may be
B) can't
C) could to
D) is able
E) would to

15. Choose the correct modal verb.

The program specifies what the automated system _____ do

A) can to
B) may be
C) could to
D) should
E) are able

16. Choose the correct modal verb.

Digital computers are ____ to recognize only two states
A) is able
B) could to
C) ought
D) able
E) should to
17. Choose the correct modal verb.
In the absence of process automation plant operators _____ to physically monitor performance values
A) could
B) should
C) is able
D) must
E) have
18. Choose the correct modal verb.
The controller would_____ to calculate
A) could
B) is able
C) must
D) should
E) be able
19. Choose the correct modal verb.
In other feedback systems the process _____ be a manufacturing operation
A) hadn't
B) can't to
C) must to
D) might
E) shouldn't to
20. Choose the correct modal verb.
Partial automation _____ be implemented in those cases where process control is practically inaccessible to human effort
A) must
B) could to
C) can to
D) able
E) had
21. Choose the correct sentence in the Passive Voice.
A) Hundreds of production workers are hire for three shifts
B) High costs involve in training employees to handle new equipment
C) Information technologies are used to handle different processes
D) The entire plant can be monitor on a large screen in a control room
E) The information is stores and analyzes on a computer
22. Choose the correct sentence in the Passive Voice.
A) The entire plant can monitor on a large screen in a control room
B) High costs are involve in training employees to handle new equipment
C) Hundreds of production workers are hired for three shifts
D) The information is being storing and analyzing on a computer
E) Information technologies are using to handle different processes
23. Choose the correct sentence in the Passive Voice.
A) Hundreds of production workers are been hired for three shifts
B) Information technologies are using to handle different processes
C) High costs are involved in training employees to handle new equipment
D) The information is being stores and analyzed on a computer
E) The entire plant can be monitoring on a large screen in a control room

24. Choose the correct sentence in the Passive Voice.
A) High costs are involving in training employees to handle new equipment
B) Hundreds of production workers are hire for three shifts
C) The information is been stored and analyzed on a computer
D) The entire plant can be monitored on a large screen in a control room
E) Information technologies are being using to handle different processes
25. Choose the correct sentence in the Passive Voice.
A) The information is stored and analyzed on a computer
B) Information technologies are been used to handle different processes
C) Hundreds of production workers are been hired for three shifts
D) High costs are involving in training employees to handle new equipment
E) The entire plant can monitored on a large screen in a control room
26. Choose the correct sentence in the Passive Voice.
A) Integrated automation can defined as software workflows
B) The programmed instructions will be prepare at two o'clock tomorrow
C) The driver must been prepared to take over control at any time
D) The new program will be tests at five o'clock tomorrow
E) Mechanized production has been developed with the help of automation
27. Choose the correct sentence in the Passive Voice.
A) The driver must be prepared to take over control at any time
B) The programmed instructions will been prepared at two o'clock tomorrow
C) Integrated automation can be defining as software workflows
D) Mechanized production has been develops with the help of automation
E) Robots are to accept very high-level instructions
28. Choose the correct sentence in the Passive Voice.
A) Scientists are investigate the laws of the universe
B) It has changed beyond recognition
C) The driver must to be prepared to take over control at any time
D) Integrated automation can be defined as software workflows
E) Mechanized production has developing with the help of automation
29. Choose the correct sentence in the Passive Voice.
A) Mechanized production has is developed with the help of automation
B) The driver must prepare to take over control at any time
C) It has changed beyond recognition
D) The programmed instructions will be prepared at two o'clock tomorrow
E) Scientists is investigated the laws of the universe
30. Choose the correct sentence in the Passive Voice.
A) The new program will be tested at five o'clock tomorrow
B) They have be accelerated the development of civilization
C) It has changed beyond recognition
D) A century have been a long period for scientific and technological progress
E) The driver must be prepares to take over control at any time
31. Choose the correct sentence in the Passive Voice.
A) The raw materials have just be sent to the factory
B) They are accelerating the development of civilization
C) Scientists was investigated the laws of the universe
D) A century have been a long period for scientific and technological progress
E) The system is being monitored by the engineers at this moment
32. Choose the correct sentence in the Passive Voice.
A) A century is been a long period for scientific and technological progress
B) Scientists was investigated the laws of the universe
C) The raw materials have just been sent to the factory
D) Fewer people will required to work in factories

E) Before robots, all the work in plants and factories were done by people

33. Choose the correct sentence in the Passive Voice.

A) It has been difficult to overestimate the role of science and technology in our life
B) The raw materials have just been sending to the factory
C) Fewer people will be required to work in factories
D) The tasks are automated totally two years ago
E) Before robots, all the work in plants and factories were done by people

34. Choose the correct sentence in the Passive Voice.

A) Scientists are investigating the laws of the universe
B) Before robots, all the work in plants and factories was done by people
C) Some years ago, it wouldn't believed that robots would replace people
D) A century is been a long period for scientific and technological progress
E) The rapid scientific progress has aroused a number of problems

35. Choose the correct sentence in the Passive Voice.

A) It is been difficult to overestimate the role of science and technology in our life
B) Some years ago, they were not believe that robots would replace people
C) Reduced headcount and increased leisure weren't been taken into consideration yet
D) The tasks were automated totally two years ago
E) Before robots, all the work in plants and factories were been done by people

36. Choose the correct sentence in the Passive Voice.

A) Some years ago, it wasn't believed that robots would replace people
B) A century is been a long period for scientific and technological progress
C) Before robots, all the work in plants and factories were been done by people
D) It is been difficult to overestimate the role of science and technology in our life
E) This trend is being representing today by the microprocessor

37. Choose the correct sentence in the Passive Voice.

A) Modern analog computer has been created in 1950
B) This trend is been represented today by the microprocessor
C) The tasks have been automated totally two years ago
D) Reduced headcount and increased leisure haven't been taken into consideration yet
E) It is been difficult to overestimate the role of science and technology in our life

38. Choose the correct sentence in the Passive Voice.

A) The tasks have automated totally two years ago
B) A century is been a long period for scientific and technological progress
C) This trend is being represented today by the microprocessor
D) The rapid scientific progress has been aroused a number of problems
E) Modern analog computer was been created in 1950

39. Choose the correct sentence in the Passive Voice.

A) The tasks have automated totally two years ago
B) A century was been a long period for scientific and technological progress
C) This trend have been represented today by the microprocessor
D) Modern analog computer was created in 1950
E)) It is been difficult to overestimate the role of science and technology in our life

40. Choose the correct sentence in the Passive Voice.

A) The rapid scientific progress have been aroused a number of problems
B) Scientists were investigated the laws of the universe
C) It was been difficult to overestimate the role of science and technology in our life
D) A century is been a long period for scientific and technological progress
E) Industrial robots need to be provided with a detailed set of instructions

41. Choose the correct prepositions.

The focus ___ automation has shifted ___ increasing quality and flexibility ___ a manufacturing process

A) in, of, in

B) of, in, at
C) ---, from, up
D) of, to, in
E) at, into, of

42. Choose the correct prepositions.

Automation ___ production is one ___ the basic factors ___ the modern scientific and technical revolution

A) at, of, in
B) from, of, at
C) in, at, of
D) of, of, in
E) at, to, of

43. Choose the correct prepositions.

The optimum utilization ___ opportunities speeds ___ economic development and satisfy most fully the needs ___ all the society members

A) in, at, in
B) at, before, of
C) at, to, of
D) of, towards, in
E) of, up, of

44. Choose the correct prepositions.

Industrial automation fulfills the aim ___ the company ___ allowing the company to run a manufacturing plant ___ 24 hours in a day

A) of, for, for
B) on, for, around
C) of, by, for
D) by, with, over
E) in, ---, of

45. Choose the correct prepositions.

As automation continues to advance day____ day, it will gain great popularity ___ new industries _____ near future

A) at, of, in
B) in, without, of
C) of, out, by
D) by, on, of
E) by, in, in

46. Choose the correct prepositions.

There is the contradiction ___these opportunities and the obstacles that are placed ___ the path ___ their use

A) between, in, of
B) without, to, in
C) after, --- , at
D) to, to , in
E) in, ----, of

47. Choose the correct prepositions.

PAS is often based ___ open standards ___ contrast ___ a <u>distributed control system</u>

A) on, in, to
B) to, of, by
C) with, of , to
D) with, ---, of
E) by, to, with

48. Choose the correct prepositions.

___ the absence ___ process automation plant operators have to physically monitor performance values and the quality ___ outputs

A) in, of, of
B) in, of, ---
C) by, in, of
D) of, with, into
E) off, with, by

49. Choose the correct prepositions

Automation ___ production is a process ___ the development ___ mechanized production

A) of, in, of
B) to , with, in
C) of, by, in
D) with, to, of
E) around, in, of

50. Choose the correct prepositions.

Total type ___ automation also focuses ___ greater levels ___ automated and autonomous business and IT operations

A) to, ---, on
B) of, on, of
C) on, of, to
D) by, by, in
E) ---, of, in

51. Choose the correct prepositions.

___ the process ___ total automation of production possible deviations can be taken ___ account beforehand

A) at, above, around
B) during, below, in
C) by, ---, at
D) in, of, into
E) in, until, near

52. Choose the correct prepositions.

Automation ___ production does not imply a complete displacement ___ human workers ___ automation

A) by, by, from
B) of, of, by
C) in, ---, of
D) ----, at, to
E) to, of, near

53. Choose the correct prepositions.

The emphasis ___ human labor activities is transferred ___ technical servicing ___ automatic machinery

A) of, with, over
B) ---, of, around
C) to, on, in
D) in, to, of
E) by, with, of

54. Choose the correct prepositions.

___ the change ___ the nature ___ labor, the content of workers' skills changes simultaneously

A) to, of, by
B) by, of, with
C) with, ---, of
D) to, in, by
E) with, in, of

55. Choose the correct prepositions.

The sensing elements are the measuring devices used ___ the feedback loop to monitor the value ___ the output variable in automated system

A) during, till, under
B) of, ---, by
C) in, of, in
D) by, in, ---
E) ----, on, on

56. Choose the correct prepositions.

There are many different kinds ___ sensors used ___ feedback control systems ___ automation

A) in, to, until
B) at, to, of
C) from, in, on
D) of, in, for
E) to, near, in

57. Choose the correct prepositions.

The controller and actuator ___ the system are the mechanisms ___ which changes ___ the process are accomplished to influence the output

A) for, on, in
B) for, in, up
C) of, at, ---
D) of, by, in
E) in, on, of

58. Choose the correct prepositions.

Electrical power can be readily converted ___ other types ___ power to perform useful work ___ automated system

A) into, of, in
B) ---, by, at
C) around, of, with
D) to, at, by
E) at, in, for

59. Choose the correct prepositions.

Monitoring and control ___ power delivery systems ___ the pole reduce the occurrence ___ outages

A) to, of, near
B) ---, to, in
C) at, to, over
D) of, on, of
E) up, with, in

60. Choose the correct prepositions.

___the processing case, energy is applied to accomplish some processing operation ___ some entity ___the factories

A) in, of, of
B) at, on, down
C) in, on, at
D) from, ---, to
E) till, in, from

61. Put question to the underlined word.

Today the focus of automation has shifted <u>to increasing quality and flexibility</u> in a manufacturing process

A) Why the focus of automation has shifted today?
B) Why has the focus of automation shifted today?
C) What purposes has shifted the focus of automation today?
D) For what purposes the focus of automation has shifted today?
E) Why has shifted the focus of automation today?

62. Put question to the underlined word.
Industries implement <u>automation</u> to increase productivity
A) What do industries implement automation to increase productivity?
B) Which industries do implement increase productivity?
C) Which industries do implement to increase productivity?
D) What does industries implement to increase productivity?
E) What do industries implement to increase productivity?
63. Put question to the underlined word.
Automation of production creates <u>a wealth of material and cultural value</u> for society
A) What creates automation of production for society?
B) What automation of production does create for society?
C) What does automation of production create for society?
D) What automation of production creates for society?
E) What does create automation of production for society?
64. Put question to the underlined word.
Industrial automation can make the production line safe for the employees <u>by deploying robots to handle hazardous conditions</u>
A) How does industrial automation can make the production line safe for the employees?
B) How can make industrial automation the production line safe for the employees?
C) How can industrial automation make the production line safe for the employees?
D) How industrial automation can make the production line safe for the employees?
E) How industrial automation can make the production line safe for the employees?
65. Put question to the underlined word.
The maintenance cost is associated <u>with machinery</u> used for industrial automation
A) What is the maintenance cost associate used for industrial automation?
B) What is associated the maintenance cost used for industrial automation?
C) What is the maintenance cost associated with?
D) What does the maintenance cost associated used for industrial automation?
E) What is the maintenance associated cost used for industrial automation?
66. Put question to the underlined word.
<u>The scientific and technical</u> revolution has opened up unusual opportunities
A) What scientific and technical revolution has opened up unusual opportunities?
B) What kind of revolution has unusual opportunities opened up?
C) What kind of revolution has opened up unusual opportunities?
D) What kind of revolution unusual opportunities has opened up?
E) What has revolution opened up unusual opportunities?
67. Put question to the underlined word.
A considerable lag in the rise of wages takes place behind the rise <u>in labor productivity</u>
A) Where a considerable lag in the rise of wages take place behind the rise?
B) Where does a considerable lag in the rise of wages taken place behind the rise?
C) Where does a considerable lag in the rise of wages take place behind the rise?
D) Where take place a considerable lag in the rise of wages place behind the rise?
E) Where does a considerable lag in the rise of wages takes place behind the rise in?
68. Put question to the underlined word.
Plant operators can manually override the process automation systems <u>when necessary</u>
A) Where a considerable lag in the rise of wages take place behind the rise?
B) Where a considerable lag in the rise of wages can take place behind the rise?
C) Where does a considerable lag in the rise of wages take place behind the rise?
D) When can plant operators manually override the process automation systems?
E) Where can take a considerable lag in the rise of wages place behind the rise?
69. Put question to the underlined word.
A process automation or automation system is used <u>to control a process such as chemical, oil refineries factories</u>

A) Why is used a process automation or automation system (PAS) used?
B) Why does a process automation or automation system (PAS) used?
C) Why a process automation or automation system (PAS) is used?
D) Why is a process automation or automation system (PAS)used?
E) Why is a process automation or automation system (PAS) use?

70. Put question to the underlined word.

<u>In many industries</u> energy costs can represent 30 to 50 percent of the total production cost

A) Where can represent energy costs 30 to 50 percent of the total production cost?
B) Where energy costs can represent 30 to 50 percent of the total production cost?
C) Where can energy costs represent 30 to 50 percent of the total production cost?
D) Where can energy cost represents 30 to 50 percents of the total production cost?
E) Where can energy costs represents 30 to 50 percents of the total production cost?

71. Put question to the underlined word.

Partial automation is found to be most effective <u>where the manufacturing equipment is designed to be automated from the outset</u>

A) Where places is partial automation found to be mosteffective?
B) Where is partial automation find to be mosteffective in?
C) In what places is partial automation found to be mosteffective?
D) In what places is found partial automation to be mosteffective?
E) In what places partial automation is found to be mosteffective?

72. Put question to the underlined word.

<u>Highly developed</u> production is based on the modern technology and sophisticated methods of control

A) Which production is base on the modern technology and sophisticated methods of control?
B) What is based on the modern technology and sophisticated methods of control?
C) Which is production based on the modern technology and sophisticated methods of control?
D) Which production is based on the modern technology and sophisticated methods of control?
E) What is production based on the modern technology and sophisticated methods of control?

73. Put question to the underlined word.

A company offers <u>many</u> opportunities to both dishonest employees and clever outsiders

A) How much opportunities does a company offer to both dishonest employees and clever outsiders?
B) How much opportunities a company offers to both dishonest employees and clever outsiders?
C) How many opportunities does a company offer to both dishonest employees and clever outsiders?
D) How opportunities does a company offer to both dishonest employees and clever outsiders?
E) How many opportunities a company offers to both dishonest employees and clever outsiders?

74. Put question to the underlined word.

<u>Digital</u> computers are able to recognize only two states in each of its millions of switches

A) What are able to recognize only two states in each of its millions of switches?
B) Which computers are able recognize only two states in each of its millions of switches?
C) Which computers are able to recognize only two states in each of its millions of switches?
D) Which computers are to recognize able only two states in each of its millions of switches?
E) Which are able to recognize only two states in each of its millions of switches?

75. Put question to the underlined word.

Machines have performed the difficult tasks <u>many times</u>

A) How much times machines have performed the difficult tasks?
B) How many times have performed machines the difficult tasks?
C) How much times have machines performed the difficult tasks?
D) How many times machines have performed the difficult tasks?
E) How many times have machines performed the difficult tasks?

76. Put question to the underlined word.

The technical workers have <u>just</u> repaired the broken equipment

A) When have the technical workers repaired the broken equipment?
B) How long the technical workers have repaired the broken equipment?

C) When did the technical workers repair the broken equipment?
D) How long time the technical workers have repaired the broken equipment?
E) When the technical workers have repaired the broken equipment?

77. Put question to the underlined word.

Each element must communicate <u>with the other elements</u> in the control system

A) What must each element communicate in the control system ?
B) What must communicate each element in the control system with?
C) What each element must communicate in the control system with?
D) What each element must communicate in the control system ?
E) What must each element communicate in the control system with in the control system?

78. Put question to the underlined word.

The <u>sensing</u> elements are the measuring devices used in the feedback loop

A) What are the measuring devices used in the feedback loop?
B) What kind of elements are the measuring devices used in the feedback loop?
C) What kind elements are used the measuring devices in the feedback loop?
D) What are used the measuring devices in the feedback loop?
E) What kind elements do the measuring devices used in the feedback loop?

79. Put question to the underlined word.

An automatic bank teller machine must receive instructions <u>from customers</u>

A) Who must an automatic bank teller machine receive instructions ?
B) Who must receive an automatic bank teller machine instructions ?
C) Who must an automatic bank teller machine receive instructions from?
D) Who an automatic bank teller machine must receive instructions from?
E) Who must receive an automatic bank teller machine instructions from?

80. Put question to the underlined word.

The engineers will be testing the <u>new</u> program at five o'clock tomorrow

A) Which program the engineers will be testing at five o'clock tomorrow?
B) Which program will be the engineers testing at five o'clock tomorrow?
C) Which program will the engineers be tested at five o'clock tomorrow?
D) Which program will be testing the engineers at five o'clock tomorrow?
E) Which program will the engineers be testing at five o'clock tomorrow?

81. Choose the correct translation

Avtomatlaşdırma sənayeləşmə yolunda mexanikləşdirmədən sonra ikinci addımdır

Автоматизация – второй шаг после механизации на пути индустриализации

A) Automation is the second step beyond mechanization in the scope of industrialization
B) Automation is second step apart from mechanization in the area of economics
C) Automating is the second way after mechanization in the scope of industrialization
D) Equipment is the second way after mechanization in the scope of industrialization
E) Supply is the second step beyond mechanics in the scope of economics

82. Choose the correct translation

İmkanlardan optimal istifadə iqtisadi inkişafı sürətləndirir və cəmiyyətin bütün üzvlərinin ehtiyaclarını ən dolğun şəkildə ödəyir

Оптимальное использование возможностей ускоряет экономическое развитие и наиболее полно удовлетворяет потребности всех членов общества

A) The optimum utilization of opportunities speeds up economic development and satisfy most fully the needs of all the members of society
B) The optimal utilization of realities speeds up industrial development and satisfy most fully the demands of all the members of society
C) The optional utilization of opportunities speeds up economic development and dissatisfy most fully the needs of all the members of society
D) The optimum utilization of advantages puts up economic increase and satisfy most fully the needs of all the members of society
E) The optimal utilization of abilities speeds up economic growth and realize most fully the needs of all the members of society

83. Choose the correct translation

Avtomatlaşdırılmış məlumatların toplanması əsas istehsal məlumatlarını toplamağa, məlumatların dəqiqliyini yaxşılaşdırmağa və məlumatların toplanması xərclərini azaltmağa imkan verə bilər

Добавление автоматизированного сбора данных может позволить вам собирать ключевую производственную информацию, повысить точность данных и снизить затраты на сбор данных

A) Developing automated data distribution can allow to collect key production information, decrease data accuracy, and reduce your data collection costs

B) Adding automating data distribution can allow to collect key production information, improve data accuracy, and improve your data collection costs

C) Adding automated data collection can allow to collect key production information, improve data accuracy, and reduce your data collection costs

D) Adding machine information collection can allow to collect key production information, improve data accuracy, and reduce your data collection costs

E) Increasing automated data collection can allow to collect key production information, improve data accuracy, and improve your data collection costs

84. Choose the correct translation

Bu yeni mürəkkəb avadanlıqla işləmək üçün işçilərin təlimi əhəmiyyətli xərclər tələb edir

Обучение сотрудников работе с этим новым сложным оборудованием требует значительных затрат

A) Substantial revenues are involved in training employees to handle this new sophisticated equipment

B) Few costs are taken in training employers to handle this new difficult equipment

C) Minor costs are involved in training employers to control this new difficult equipment

D) Substantial costs are involved in training employees to handle this new sophisticated equipment

E) Substantial incomes are involved in training employees to manage this new sophisticated equipment

85. Choose the correct translation

Zavod operatorları lazım olduqda proseslərin avtomatlaşdırılması sistemlərini əl ilə ləğv edə bilər

При необходимости операторы предприятий могут вручную отключать системы автоматизации процессов

A) Plant operators can manually override the process automation systems when necessary

B) Plant drivers can manually override the process automation systems when unnecessary

C) Plant operators can manually to override the process automation systems when necessary

D) Works operators can by hand start the process automating systems when necessary

E) Plant regulators can manually start the process automation systems when unnecessary

86. Choose the correct translation

Proqram təminatı və idarəetmə vasitələri avadanlığın ən az enerji tələb edən optimal sürətlə işləməsini tənzimləyir

Программное обеспечение и элементы управления регулируют работу оборудования на оптимальной скорости, требующей наименьших затрат энергии

A) The software and controls regulate equipment to run at the optimum speed that increases the last energy

B) The software and controls regulate facilities to run at the optimum speed that require the most energy

C) The hardware and controls improve equipment to run at the optimum speed that requires the most energy

D) The software and controls regulate equipment to run at the optimum speed that requires the least energy

E) The hardware and controls optimize equipment to run at the optimum speed that requires the least energy

87. Choose the correct translation

İstehsalın avtomatlaşdırılmasının məqsədi əməyin səmərəliliyini və istehsal olunan məhsulların keyfiyyətini yüksəltməkdir

Цель автоматизации производства – повышение эффективности труда и качества выпускаемой продукции

A) The goal of the automation of production is to improve the efficiency of labor and the quality of manufactured products

B) The goal of the automation of products is to improve the effectiveness of labor and the quantity of produced goods

C) The purpose of the mechanization of production is to decrease the efficiency of labor and the quality of manufactured products
D) The goal of the mechanization of production is to decrease the effectiveness of labor and the quantity of manufactured products
E) The aim of the mechanization of products is to reduce the efficiency of labor and the quality of produced goods

88. Choose the correct translation

İstehsalın qismən avtomatlaşdırılması sadə avtomatik cihazların insan əməyini səmərəli şəkildə əvəz edə bildiyi yerlərdə həyata keçirilir

Частичная автоматизация производства реализуется там, где простые автоматические устройства могут эффективно заменить человеческий труд

A) Partial automation of production is realized in those places when simple automatic devices can effectively distribute human labor.
B) Shared automation of production is implemented in those places when simple automatic devices can effectively replace human labor.
C) Shared automating of production is regulated in those places where complex automatic devices can effectively change human labor.
D) Partial automation of production is realized in that places where simple automatic equipment can effectively change human labor.
E) Partial automation of production is implemented in those places where simple automatic devices can effectively replace human labor.

89. Choose the correct translation

Avtomatlaşdırma dərəcəsini müəyyən edən amillər, ilk növbədə, xüsusi istehsal şəraitində xərc və texniki-iqtisadi imkanlardır

Факторами, определяющими степень автоматизации, являются, прежде всего, стоимость и осуществимость в конкретных условиях производства

A) Facts determining the level of automation are primarily cost and feasibility under specific production conditions
B) Factors deteriorating the degree of automation are primarily cost and easibility above specific production conditions
C) Facts determining the level of automation are primarily benefit and feasibility under specific production realities
D) Factors determining the degree of automation are primarily cost and feasibility under specific production conditions
E) Factors determining the degree of automation are primarily cost and easibility above specific producing conditions

90. Choose the correct translation

Köçürmə və yerləşdirmə ən asanlıqla məhsul üzərində işi yerinə yetirmək üçün nəzərdə tutulmuş avtomatlaşdırılmış istehsal sistemlərində görülür

Перенос и позиционирование чаще всего наблюдаются в автоматизированных производственных системах, предназначенных для выполнения работ над изделием

A) The transportation and position is least readily seen in automated automation systems designed to perform work on a product
B) The transfer and positioning is most difficultly seen in automated automation systems designed to perform work on a product
C) The transfer and positioning is most readily seen in automated manufacturing systems designed to perform work on a product
D) The transfer and positioning is most hardly seen in automated manufacturing systems organized to perform work on a product
E) The transportation and position is least readily seen in automated manufacturing systems designed to perform work on a product

91. Choose the correct translation

Proqram nisbətən mürəkkəb sistemlərdə dəyişdirilə bilən hərəkətlərin ardıcıllığını təmin edir

Программа предусматривает изменение последовательности действий в относительно сложных системах

A) The program provides for the order of actions to be altered in relatively simple programs.
B) The hardware provides for the sequence of motions to be altered in relatively complex systems.
C) The program provides for the order of motions to be changed in nearly sophisticated systems.
D) The software decides for the sequence of actions to be changed in nearly simple systems.
E) The program provides for the sequence of actions to be altered in relatively sophisticated systems.

92. Choose the correct translation

Əks əlaqə dövrəsinin məqsədi proqramlaşdırılmış addımın yerinə yetirildiyini yoxlamaqdır

Целью цикла обратной связи является проверка того, что запрограммированный шаг был выполнен

A) The purpose of the feedback loop is to verify that the programmed stage has been rejected
B) The purpose of the feedback loop is to deny that the program step has been carried out
C) The purpose of the feedback loop is to verify that the programmed step has been carried out
D) The aim of the feedback loop is to deny that the programmed stage has been carried out
E) The goal of the feedback loop is to verify that the program step has been rejected

93. Choose the correct translation

Həssas elementlər dəyişənin çıxış dəyərini izləmək üçün əks əlaqə dövrəsində istifadə olunan ölçmə cihazlarıdır

Чувствительные элементы — это измерительные устройства, используемые в контуре обратной связи для контроля значения выходной переменной

A) The sensing elements are the measuring devices used in the feedback loop to monitor the value of the output variable
B) The sensor elements are the measuring devices included in the feedback loop to control the value of the input variable
C) The sensing parts are the measuring facilities used in the feedback loop to regulate the value of the input variable
D) The sensing parts are the measuring devices included in the feedback loop to monitor the value of the input variation
E) The sensor parts are the measuring devices used in the feedback loop to control the value of the output variable

94. Choose the correct translation

Elektrik enerjisi ən çox yönlüdür, çünki digər mənbələrdən asanlıqla əldə edilə bilir

Электрическая энергия является наиболее универсальной, поскольку ее можно легко получить из других источников

A) Electric power is the most different, because it can be easily generated from other sources
B) Electrician power is the least versatile, because it can be easily generated from other parts
C) Electrical power is the most versatile, because it can be difficultly used from other sources
D) Electrical power is the most versatile, because it can be readily generated from other sources
E) Electric source is the most unique, because it can be readily used from other parts

95. Choose the correct translation

Avtomatlaşdırılmış hər hansı bir sistemin işində bəzən normal əməliyyat dövrü ərzində nasazlıqlar və xətalar baş verir

В работе любой автоматизированной системы в ходе обычного цикла операций иногда возникают сбои и ошибки

A) In the control of any automated system, malfunctions and errors sometimes occur during the abnormal cycle of operations
B) In the function of any automated system, errors and mistakes always occur during the normal cycle of operations
C) In the operation of any automated system, malfunctions and errors sometimes occur during the incorrect cycle of operations
D) In the operation of any automated system, malfunctions and errors sometimes occur during the normal cycle of operations

E) In the regulation of any automated system, functions and errors seldom occur during the normal cycle of operations

96. Choose the correct translation

Daha ağıllı proqram təminatının yayılması və bulud əsaslı xidmətlərin bolluğu olacaq

Будет распространяться более умное программное обеспечение и обилие облачных сервисов

A) There will be decrease of smarter hardware and an abundance of cloud-based devices
B) There will be multiplication of smarter software and and lack of cloud-based services
C) There will be proliferation of smarter hardware and an lack of cloud-based services
D) There will be proliferation of smarter software and an abundance of cloud-based services
E) There will be decrease of smarter software and an abundance of cloud-based functions

97. Choose the correct translation

İstehsal xərclərinin azaldılması və məhsulun davamlı təkmilləşdirilməsi həmişə avtomatlaşdırma sistemləri üçün vacib amillər hesab olunur

Снижение производственных затрат и постоянное совершенствование продукции всегда считаются важными факторами для систем автоматизации

A) Improved manufacture costs and steady product improvement are always considered unimportant factors for automation systems
B) Reduced manufactured costs and unstable product improvement are always counted important factors for automation factors
C) Reduced manufacturing costs and steady product improvement are always considered important factors for automation systems
D) Decreased manufacturing incomes and steady product promotion are seldom considered important factors for automation factors
E) Increased manufacturing incomes and steady product release are always considered important factors for automation systems

98. Choose the correct translation

Böyük həcmli məlumatların işlənməsi yalnız yüksək sürətli rəqəmsal kompüterlər tərəfindən həyata keçirilə bilər

Обработка огромных объемов данных может быть осуществлена только с помощью высокоскоростных цифровых компьютеров

A) The analyzing of little amounts of data can be accomplished only by high-speed numbered computers
B) The organizing of enormous amounts of information can be achieved only by high-speed digital computers
C) The processing of enormous amounts of data can be accomplished only by high-speed digital computers
D) The procession of enormous amounts of information can be accomplished only by low-speed digital computers
E) The process of little amounts of data can be accomplished often by high-speed digital computers

99. Choose the correct translation

Rəqəmsal kompüterlər daha sürətlidir, onlar siqnal müdaxiləsinə o qədər də həssas deyil

Цифровые компьютеры быстрее, они не так восприимчивы к помехам сигнала

A) Numerical computers are faster, they are so susceptible to signal interference
B) Digital computers are slower, they are not so susceptible to signal interference
C) Digital computers are faster, they are not so susceptible to signal interference
D) Numbered computers are faster, they are so susceptible to signal interference
E) Digital computers are slower, they are not so susceptible to signal interference

100. Choose the correct translation

Çıxış qurğuları istifadəçiyə məlumatların kompüter tərəfindən işlənməsinin nəticələrini görməyə imkan verir

Устройства вывода позволяют пользователю видеть результаты обработки данных компьютером

A) Outflow devices let the user see the results of the computer's data regulation
B) Output equipment let the user see the results of the computer's data processing
C) Input devices let the user see the results of the computer's data control
D) Output devices let the user see the results of the computer's data processing

E) Inflow equipment let the user see the outcomes of the computer's data monitoring

101. Choose the correct sentence with Gerund.

A) Developing information technology the programmers made success
B) While developing information technology they had a lot of difficulties
C) The idea of developing information technology occurred in the 20th century
D) When developing information technology one must study very much
E) Developing information technology they made the workers' work easier

102. Choose the correct sentence with Gerund.

A) Creating the digital computer was an achievement of the 20th century
B) When creating the digital computer the data can be processed
C) The processing of enormous amounts of data can be accomplished
D) Creating the digital computer the life became much easier
E) Programming languages are easier to use and are more powerful

103. Choose the correct sentence with Gerund.

A) Not mastering information technologies they couldn't find a good job
B) Our students are mastering information technologies at the moment
C) This technology is providing to be a versatile sensory capability now
D) Mastering information technologies he could establish his career
E) Our aim is mastering information technologies nowadays

104. Choose the correct sentence with Gerund.

A) We like working in automated fields nowadays
B) While working in automated fields he continued his education
C) Working in automated fields he had to learn sensor technology
D) When working in automated fields the operators must be more careful
E) The operators mastered sensor technology working in automated fields

105. Choose the correct sentence with Gerund.

A) Not executing the associated calculations the operators made some mistakes
B) When executing the associated calculations the operators must be careful
C) Executing the associated calculations they solved a lot of problems
D) The operators are executing the associated calculations at the moment
E) They insisted on executing the associated calculations much faster

106. Choose the correct sentence with Gerund.

A) When creating analog computer a new era was opened in this field
B) After inventing analog computer digital computer was invented
C) Inventing analog computer many significant developments have occurred
D) Not inventing analog computer people faced with many problems before
E) While inventing analog computer a lot of problems were solved

107. Choose the correct sentence with Gerund.

A) When working with sensor technology you must be attentive
B) The operators usually learn the instructions while working
C) The meeting of the group are to be at 5 o'clock today
D) The beginning of the work is always difficult for learners
E) They created Universal Automatic Computer without hesitating

108. Choose the correct sentence with Gerund.

A) They solved the task correctly performing calculations yesterday
B) They made a great invention propelling a trend to miniaturization
C) Propelling a trend to miniaturization in computer technology has occurred
D) Performing calculations at much greater speeds they completed the task
E) When propelling a trend to miniaturization one must work hard

109. Choose the correct sentence with Gerund.

A) When learning information technologies you have to be attentive
B) Not learning information technologies he couldn't built his working career
C) Learning information technologies he built his working career
D) While building his working career he learned information technologies

E) We don't mind learning the automation and information technologies

110. Choose the correct sentence with Gerund.

A) The operator suggested controlling and monitoring the automated fields
B) Not monitoring the automated fields they couldn't increase productivity
C) While monitoring the automated fields the operator saw some errors
D) Controlling and monitoring the automated fields he ran the plant
E) When controlling the automated fields the operators must be attentive

111. Choose the correct sentence with Gerund.

A) Not knowing information technologies he couldn't find a job
B) When studying information technologies you must work hard
C) Studying information technologies he passed the examinations
D) Automation and information technologies are worth studying
E) While studying information technologies he had some difficulties

112. Choose the correct sentence with Gerund.

A) Not knowing computer science you cannot work at this company
B) The students couldn't help mastering information technologies
C) The meeting of the computer engineers will be tomorrow
D) While learning computer science he attended computer courses
E) When learning computer science the students have to work regularly

113. Choose the correct sentence with Gerund.

A) She didn't want to listen to these boring and annoying songs
B) The beginning of the work is backbreaking and complicated
C) The hope of possessing the new generation of the computers is great
D) Possessing great property they could build a beautiful palace
E) Not possessing any property he had to leave the country

114. Choose the correct sentence with Gerund.

A) Mastering information technologies he had to overcome some problems
B) While mastering information technologies he worked at his company
C) When working at this company everyone has to be hardworking
D) Not working anywhere he decided to master computer science
E) Our mastering information technologies is the demand of this century

115. Choose the correct sentence with Gerund.

A) Implementing computers or robots they automated the production line
B) Implementing computers or robots is the main task of automation
C) When automating the production line the initial cost is very high
D) Not knowing automation process automated production line was failed
E) While automating the production line robots are implemented here

116. Choose the correct sentence with Gerund.

A) When reducing costs related to employees they obtained savings
B) While reducing costs related to employees the owner had serious problems
C) Not reducing costs related to employees the company couldn't obtain savings
D) Reducing costs related to employees is the advantages of automation
E) Reducing costs related to employees the owner saved very much savings

117. Choose the correct sentence with Gerund.

A) When controlling the production line they must be very attentive
B) While monitoring the plant they revealed some problems there
C) Increasing productivity they improved the quality and flexibility
D) Industrial control systems allow for monitoring in the plant
E) Monitoring industrial control systems he controls locally and remotely

118. Choose the correct sentence with Gerund.

A) One of basic aims of total automation is empowering the workforce
B) Empowering the workforce total automation helps them work smarter
C) Not empowering the workforce they failed to augment their skills
D) Total automation empowers the workforce focusing on automated business

E) While empowering the workforce total automation focuses on IT operations

119. Choose the correct sentence with Gerund.

A) Modifying the information of other person is one of the computer crimes
B) Modifying the information the specialist committed a computer crime
C) Not having access to the computer he couldn't use the information
D) While modifying the information in the computer he was caught
E) When working with the computer you never modify the information

120. Choose the correct sentence with Gerund.

A) The programmers were drinking a coffee named Java then
B) Java is a general-purpose programming language
C) The people were trying to sell him the stolen information at that time
D) Java is a high-level and object-oriented programming language
E) Programming is the composition of sequences of instructions

121. Connect the sentences using relative clause.

Automation is one of the basic factors in the scientific and technical revolution. The scientific and technical revolution opens up great opportunities for mankind

A) Automation is one of the basic factors in the scientific and technical revolution, that the scientific and technical revolution opens up great opportunities for mankind
B) Automation is one of the basic factors in the scientific and technical revolution, which it opens up great opportunities for mankind
C) Automation is one of the basic factors in the scientific and technical revolution, when the scientific and technical revolution opens up great opportunities for mankind
D) Automation is one of the basic factors in the scientific and technical revolution, which opens up great opportunities for mankind
E) Automation is one of the basic factors in the scientific and technical revolution, which the scientific and technical revolution opens up great opportunities for mankind

122. Connect the sentences using relative clause.

Industrial automation saves the monthly wages of the workers. This leads to cost savings for the company

A) Industrial automation saves the monthly wages of the workers where leads to cost savings for the company
B) Industrial automation saves the monthly wages of the workers which this leads to cost savings for the company
C) Industrial automation saves the monthly wages of the workers which leads to cost savings for the company
D) Industrial automation saves the monthly wages of the workers which wages leads to cost savings for the company
E) Industrial automation saves the monthly wages of the workers that they leads to cost savings for the company

123. Connect the sentences using relative clause.

Industrial automation has some disadvantages. These disadvantages include high costs, reduced worker employment and so on.

A) Industrial automation has some disadvantages, which include high costs, reduced worker employment and so on
B) Industrial automation has some disadvantages, which they include high costs, reduced worker employment and so on
C) Industrial automation has some disadvantages, who include high costs, reduced worker employment and so on
D) Industrial automation has some disadvantages, that they include high costs, reduced worker employment and so on
E) Industrial automation has some disadvantages, where include high costs, reduced worker employment and so on

124. Connect the sentences using relative clause.

Maintenance results in operational inefficiency. Maintenance is carried out at set intervals

A) Maintenance, who is carried out at set intervals, results in operational inefficiency
B) Maintenance, which is carried out at set intervals, results in operational inefficiency
C) Maintenance, that it carried out at set intervals, is results in operational inefficiency
D) Maintenance, when is carried out at set intervals, results in operational inefficiency.
E) Maintenance, which it is carried out at set intervals, results in operational inefficiency

125. Connect the sentences using relative clause.

The controller and actuator of the system are the mechanisms. These mechanisms are usually designed for the system

A) The controller and actuator of the system are the mechanisms what are usually designed for the system
B) The controller and actuator of the system are the mechanisms that which are usually designed for the system
C) The controller and actuator of the system are the mechanisms that they are usually designed for the system
D) The controller and actuator of the system are the mechanisms who are usually designed for the system
E) The controller and actuator of the system are the mechanisms which are usually designed for the system

126. Connect the sentences using relative clause.

Feedback controls should do the sensing, calculating, and manipulating. Feedback controls are used in automated systems

A) Feedback controls, which they are used in automated systems, should do the sensing, calculating, and manipulating
B) Feedback controls, what are used in automated systems, should do the sensing, calculating, and manipulating
C) Feedback controls, that they are used in automated systems, should do the sensing, calculating, and manipulating
D) Feedback controls, which are used in automated systems, should do the sensing, calculating, and manipulating
E) Feedback controls, who are used in automated systems, should do the sensing, calculating, and manipulating

127. Connect the sentences using relative clause.

Electrical power can be converted into other types of power. These types of power are mechanical, hydraulic, and pneumatic

A) Electrical power can be converted into other types of power, that which are mechanical, hydraulic, and pneumatic
B) Electrical power can be converted into other types of power, which they are mechanical, hydraulic, and pneumatic
C) Electrical power can be converted into other types of power, who are mechanical, hydraulic, and pneumatic
D) Electrical power can be converted into other types of power, when are mechanical, hydraulic, and pneumatic
E) Electrical power can be converted into other types of power, which are mechanical, hydraulic, and pneumatic

128. Connect the sentences using relative clause.

The second type of action is seen in automated manufacturing systems. The second type of action is transfer and positioning

A) The second type of action, what are transfer and positioning, is seen in automated manufacturing systems
B) The second type of action, which they are is transfer and positioning, is seen in automated manufacturing systems
C) The second type of action, which is transfer and positioning, is seen in automated manufacturing systems
D) The second type of action, which it is transfer and positioning, is seen in automated manufacturing systems
E) The second type of action, that it is transfer and positioning, is seen in automated manufacturing systems

129. Connect the sentences using relative clause.

The engineers will be testing the new program at five o'clock tomorrow. These engineers work for the company

A) The engineers, who they work for the company, will be testing the new program at five o'clock tomorrow
B) The engineers, that they work for the company, will be testing the new program at five o'clock tomorrow
C) The engineers, what work for the company, will be testing the new program at five o'clock tomorrow
D) The engineers, who work for the company, will be testing the new program at five o'clock tomorrow
E) The engineers, that who work for the company, will be testing the new program at five o'clock tomorrow

130. Connect the sentences using relative clause.

The engineers will be testing the new program at five o'clock tomorrow. All the managers will be at work then

A) The engineers will be testing the new program at five o'clock tomorrow, who all the managers will be at work
B) The engineers will be testing the new program at five o'clock tomorrow, which all the managers will be at work
C) The engineers will be testing the new program at five o'clock tomorrow, when all the managers will be at work
D) The engineers will be testing the new program at five o'clock tomorrow, where all the managers will be at work
E) The engineers will be testing the new program at five o'clock tomorrow, that when all the managers will be at work

131. Connect the sentences using relative clause.

Mr. Thomas informed that the engineers will be monitoring the system next week. Mr. Thomas is the owner

A) Mr. Thomas, that who is the owner, informed that the engineers will be monitoring the system next week
B) Mr. Thomas, what is the owner, informed that the engineers will be monitoring the system next week
C) Mr. Thomas, who he is the owner, informed that the engineers will be monitoring the system next week
D) Mr. Thomas, who is the owner, informed that the engineers will be monitoring the system next week
E) Mr. Thomas, which is the owner, informed that the engineers will be monitoring the system next week

132. Connect the sentences using relative clause.

Automated machines need people. These people design, program and service them

A) Automated machines need people who design, program and service them
B) Automated machines need people which design, program and service them
C) Automated machines need people whose design, program and service them
D) Automated machines need people who they design, program and service them
E) Automated machines need people that they design, program and service them

133. Connect the sentences using relative clause.

Engineers and technicians have already become skilled. This is very important today

A) Engineers and technicians have already become skilled, that this is very important today
B) Engineers and technicians have already become skilled, which this is very important today
C) Engineers and technicians have already become skilled, who is very important today
D) Engineers and technicians have already become skilled, which is very important today
E) Engineers and technicians have already become skilled, when is very important today

134. Connect the sentences using relative clause.

There will be some super high-tech factories. These factories make highly specialized products

A) There will be some super high-tech factories which they make highly specialized products
B) There will be some super high-tech factories who make highly specialized products
C) There will be some super high-tech factories where make highly specialized products
D) There will be some super high-tech factories that there make highly specialized products
E) There will be some super high-tech factories that make highly specialized products

135. Connect the sentences using relative clause.

Modern analog computer was created in the 1930s. After 1930, a number of inventions happened

A) Modern analog computer was created in the 1930s, after what a number of inventions happened
B) Modern analog computer was created in the 1930s, after when that a number of inventions happened
C) Modern analog computer was created in the 1930s, when a number of inventions happened
D) Modern analog computer was created in the 1930s, after where a number of inventions happened

E) Modern analog computer was created in the 1930s, after a number of which inventions happened

136. Connect the sentences using relative clause.

Artificial intelligence is an advanced field of computer science. In this field the computer exhibits human intelligence

A) Artificial intelligence is an advanced field of computer science, which the computer exhibits human intelligence

B) Artificial intelligence is an advanced field of computer science, when the computer exhibits human intelligence

C) Artificial intelligence is an advanced field of computer science, what the computer exhibits human intelligence

D) Artificial intelligence is an advanced field of computer science, where the computer exhibits human intelligence

E) Artificial intelligence is an advanced field of computer science, that where the computer exhibits human intelligence

137. Connect the sentences using relative clause.

Our life is uncomparable with the life of people at the beginning of the 20th century. At the beginning of the 20th century, people didn't have refrigerators, computers, microwave ovens, etc

A) Our life is uncomparable with the life of people at the beginning of the 20th century, that when people didn't have refrigerators, computers, microwave ovens, etc.

B) Our life is uncomparable with the life of people at the beginning of the 20th century, what people didn't have refrigerators, computers, microwave ovens, etc.

C) Our life is uncomparable with the life of people at the beginning of the 20th century, which people didn't have refrigerators, computers, microwave ovens, etc.

D) Our life is uncomparable with the life of people at the beginning of the 20th century, when people didn't have refrigerators, computers, microwave ovens, etc.

E) Our life is uncomparable with the life of people at the beginning of the 20th century, which that people didn't have refrigerators, computers, microwave ovens, etc.

138. Connect the sentences using relative clause.

"COMPUTER" is the word. The full form of this word is Common Operating Machine Purposely Used for Technological and Educational Research

A) "COMPUTER" is the word, the full form of which is Common Operating Machine Purposely Used for Technological and Educational Research

B) "COMPUTER" is the word, the full of which form is Common Operating Machine Purposely Used for Technological and Educational Research

C) "COMPUTER" is the word, which the full form of is Common Operating Machine Purposely Used for Technological and Educational Research

D) "COMPUTER" is the word, the full form of who is Common Operating Machine Purposely Used for Technological and Educational Research

E) "COMPUTER" is the word, the full form of what is Common Operating Machine Purposely Used for Technological and Educational Research

139. Connect the sentences using relative clause.

There are two main types of computers. They are analogue and digital

A) There are two main types of computers, which are analogue and digital

B) There are two main types of computers, which they are analogue and digital

C) There are two main types of computers, that they are analogue and digital

D) There are two main types of computers, who are analogue and digital

E) There are two main types of computers, where are analogue and digital

140. Connect the sentences using relative clause.

The real power of a computer depends on the speed. With this speed it checks switches per second

A) The real power of a computer depends on the speed that with which it checks switches per second

B) The real power of a computer depends on the speed which with it checks switches per second

C) The real power of a computer depends on the speed with which it checks switches per second

D) The real power of a computer depends on the speed with who it checks switches per second

E) The real power of a computer depends on the speed with where it checks switches per second

141. Choose the correct Reported Speech.
They said: "Advanced mathematical theory of control systems have been evolved"
A) They said that advanced mathematical theory of control systems had been evolved
B) They said advanced mathematical theory of control systems are evolved
C) They said that advanced mathematical theory of control systems were evolved
D) They said advanced mathematical theory of control systems had evolved
E) They told that advanced mathematical theory of control systems has been evolved

142. Choose the correct Reported Speech.
She said to us : "The theory includes traditional negative feedback control"
A) She told us that the theory has included traditional negative feedback control
B) She told us that the theory had included traditional negative feedback control
C) She told us that the theory include traditional negative feedback control
D) She told us that the theory was included traditional negative feedback control
E) She told us that the theory included traditional negative feedback control

143. Choose the correct Reported Speech.
He said to her: " Most processes are more complex than the flying-ball governor"
A) He told her that most processes was more complex than the flying-ball governor
B) He told her that most processes have more complex than the flying-ball governor
C) He told her that most processes were more complex than the flying-ball governor
D) He told her that most process were more complex than the flying-ball governor
E) He told her that most processes had more complex than the flying-ball governor

144. Choose the correct Reported Speech.
We said to her: "Adaptive control theory is concerned with the problem of defining an appropriate index of performance "
A) We told her that adaptive control theory has concerned with the problem of defining an appropriate index of performance
B) We told her that adaptive control theory has been concerned with the problem of defining an appropriate index of performance
C) We told her that adaptive control theory was concerned with the problem of defining an appropriate index of performance
D) We told her that adaptive control theory are concerned with the problem of defining an appropriate index of performance
E) We told her that adaptive control theory had concerned with the problem of defining an appropriate index of performance

145. Choose the correct Reported Speech.
The engineer said: "Then optimal and adaptive control theories operate appropriate index of performance"
A) The engineer told that then optimal and adaptive control theories operated appropriate index of performance
B) The engineer told that then optimal and adaptive control theories is operated appropriate index of performance
C) The engineer told that then optimal and adaptive control theories are operated appropriate index of performance
D) The engineer told that then optimal and adaptive control theories operates appropriate index of performance
E) The engineer told that then optimal and adaptive control theories were operated appropriate index of performance

146. Choose the correct Reported Speech.
The teacher explained to the student: "Artificial intelligence is an advanced field of computer science now"
A) The teacher explained to the student that artificial intelligence has an advanced field of computer science then
B) The teacher explained to the student that artificial intelligence was an advanced field of computer science now

C) The teacher explained to the student that artificial intelligence was an advanced field of computer science then
D) The teacher explained to the student that artificial intelligence had been an advanced field of computer science then
E) The teacher explained to the student that artificial intelligence are an advanced field of computer science then

147. Choose the correct Reported Speech.

The plant owner said to the workers: "Learn the instructions of the use of the computer"

A) The plant owner told the workers for learn the instructions of the use of the computer
B) The plant owner ask workers learn the instructions of the use of the computer
C) The plant owner told the workers to learn the instructions of the use of the computer
D) The plant owner asks workers to learn the instructions of the use of the computer
E) The plant owner said the workers learning the instructions of the use of the computer

148. Choose the correct Reported Speech.

They said to the boy: "Assemble the product now"

A) They a asked the boy to assemble the product
B) They told the boy to assemble the product then
C) They told the boy assembled the product now
D) They said him to assemble the product now
E) They told the boy to have assembled the product then

149. Choose the correct Reported Speech.

The engineer said to the worker: "A robot endowed with artificial intelligence might be capable of executing the command"

A) The engineer told the worker that a robot is endowed with artificial intelligence might be capable of executing the command
B) The engineer said them that a robot had been endowed with artificial intelligence might be capable of executing the command
C) The engineer told the worker that a robot endowed with artificial intelligence might be capable of executing the command
D) The engineer told the worker that a robot endow with artificial intelligence might be capable of executing the command
E) The engineer told the worker that a robot was endowed with artificial intelligence might be capable of executing the command

150. Choose the correct Reported Speech.

They gave orders to the robot "Communicate with humans now"

A) They gave orders him communicate with humans then
B) They gave orders to the robot for communicate with humans now
C) They gave orders to the robot to communicate with humans then
D) They gave orders to the robot is communicated with humans then
E) They gave orders to him for communication with humans then

151. Choose the correct Reported Speech.

She told us: "The focus of automation has shifted to increasing quality in a manufacturing process"

A) She told us the focus of automation was shifted to increasing quality in a manufacturing process
B) She told that the focus of automation had shift to increasing quality in a manufacturing process
C) She told us the focus of automation had shifted to increasing quality in a manufacturing process
D) She told us the focus of automation had been shifted to increasing quality in a manufacturing process
E) She told that the focus of automation has been shifted to increasing quality in a manufacturing process

152. Choose the correct Reported Speech.

He said: "Alongside with the advantages industrial automation has some disadvantages as well"

A) He said that alongside with the advantages industrial automation had some disadvantages as well
B) He said that alongside with the advantages industrial automation had had some disadvantages as well
C) He said that alongside with the advantages industrial automation have some disadvantages as well
D) He said that alongside with the advantages industrial automation have been some disadvantages as well
E) He said that alongside with the advantages industrial automation had been some disadvantages as well

153. Choose the correct Reported Speech.

The engineer asked:"Where can energy costs represent 30 to 50 percent of the total production cost?"

A) The engineer asked where energy costs can represent 30 to 50 percent of the total production cost
B) The engineer asked where energy costs could represent 30 to 50 percent of the total production cost
C) The engineer asked where did energy costs represent 30 to 50 percent of the total production cost
D) The engineer asked where energy cost represent 30 to 50 percent of the total production cost
E) The engineer asked where could be energy costs represent 30 to 50 percent of the total production cost

154. Choose the correct Reported Speech.

He said to us: "Longitudinal and lateral control is taken over by the system"

A) He said to us that Longitudinal and lateral control was being taken over by the system
B) He told to me that Longitudinal and lateral control was been taken over by the system
C) He said to us that Longitudinal and lateral control has been taken over by the system
D) He told us that Longitudinal and lateral control was taken over by the system
E) He said to me that Longitudinal and lateral control has taken over by the system

155. Choose the correct Reported Speech.

They said: "We are implementing total automation in the plant at that time this year"

A) They said we were implementing total automation in the plant at that time last year
B) They said were implementing total automation in the plant at that time last year
C) They said we were implemented total automation in the plant at that time this year
D) They said they were implementing total automation in the plant at that time that year
E) They said they implemented total automation in the plant at that time this year

156. Choose the correct Reported Speech.

Engineers claimed: "We determined all the factors influencing automation last year"

A) Engineers claimed they determined all the factors influencing automation previous year
B) Engineers claimed they had to determine all the factors influencing automation last year
C) Engineers claimed we had determined all the factors influencing automation last year
D) Engineers claimed they have been determined all the factors influencing automation previous year
E) Engineers claimed that they had determined all the factors influencing automation previous year

157. Choose the correct Reported Speech.

The controller told me: "I will calculate the error and you will vary the system input"

A) The controller told me that he would calculate the error and I would vary the system input
B) The controller told me that he calculated the error and she varied the system input
C) The controller told me that he will be calculated the error and I would vary the system input
D) The controller told me that he had calculated the error and it had varied the system input
E) The controller told me that he would calculate the error and she will vary the system input

158. Choose the correct Reported Speech.

She asked: "Where does the program consist of a limited number of well-defined actions?"

A) She asked where the program consisted of a limited number of well-defined actions
B) She asked where the program have consisted of a limited number of well-defined actions
C) She asked where the program consists of a limited number of well-defined actions
D) She asked where does the program consisted of a limited number of well-defined actions
E) She asked where has the program consist of a limited number of well-defined actions

159. Choose the correct Reported Speech.

Factory owner told us: "The workers won't be altering the sophisticated systems soon"

A) Factory owner tell us that the workers alter the sophisticated systems soon
B) Factory owner told us that the workers will be altering the sophisticated systems soon
C) Factory owner told us that the workers wouldn't be altering the sophisticated systems soon
D) Factory owner tell us that the workers would altering the sophisticated systems soon
E) Factory owner told us that the workers wouldn't be alter the sophisticated systems soon

160. Choose the correct Reported Speech.

He asked: "Where do malfunctions and errors sometimes occur?"

A) He asked that where malfunctions and errors sometimes occur
B) He asked where malfunctions and errors sometimes occurred
C) He asked that where did malfunctions and errors sometimes occurred

D) He asked that where does malfunctions and errors sometimes occur
E) He asked where did malfunctions and errors sometimes occur

161. Match the definition to the word.
the quality of bending easily without breaking
A) Engendering
B) Occurrence
C) Flexibility
D) Efficiency
E) Substation

162. Match the definition to the word.
to protect from harm or damage with an appropriate measure
A) Divert
B) Adaptive
C) Safeguard
D) Deviation
E) Hazard

163. Match the definition to the word.
not achieving maximum productivity; wasting or failing to make the best use of time or resources
A) Implementation
B) Capability
C) Inefficiency
D) Expand
E) Outage

164. Match the definition to the word.
is the state or quality of being intricate or complicated
A) Hazard
B) Enormous
C) Manufacturer
D) Complexity
E) Capability

165. Match the definition to the word.
to plan or coordinate the elements of (a situation) to produce a desired effect, especially surreptitiously
A) Accomplish
B) Orchestrate
C) Expand
D) Essential
E) Redundancy

166. Match the definition to the word.
to be able to change from one form to another
A) Generation
B) Access
C) Representative
D) Convert
E) Database

167. Match the definition to the word.
existing or occurring at the beginning
A) Manual
B) Multiple
C) Initial
D) Asset
E) Coherence

168. Match the definition to the word.
more advanced or complex than others

A) Sophisticated
B) Temporarily
C) Experiment
D) Database
E) Coordinate

169. Match the definition to the word.
a period of time when the electricity supply to a building or area is interrupted
A) Handle
B) Sequence
C) Outage
D) Digital
E) Monitor

170. Match the definition to the word.
make (someone) stronger and more confident
A) Processor
B) Confederate
C) Empower
D) Emerge
E) Outsider

171. Match the definition to the word.
relating to the sides of something, or moving in a sideways direction
A) Coherence
B) Asset
C) Lateral
D) Revengeful
E) Confederate

172. Match the definition to the word.
the process of keeping something in good condition
A) Lateral
B) Expenses
C) Multiple
D) Maintenance
E) Networking

173. Match the definition to the word.
a condition or circumstance that puts one in a favourable or superior position
A) Disadvantages
B) Advantages
C) Application
D) Longitudinal
E) Inefficiency

174. Match the definition to the word.
to change the emphasis, direction, or focus
A) Control
B) Leverage
C) Shifted
D) Commensurate
E) Monitor

175. Match the definition to the word.
The state of being watchful for possible danger
A) Provision
B) Reassign
C) Essential
D) Heterogeneous
E) Hazard

176. Match the definition to the word.
a large quantity of something
A) Abundance
B) Execution
C) Alienation
D) Override
E) Squander
177. Match the definition to the word.
the action of obtaining something from a source or origin
A) Squander
B) Maintenance
C) Derivation
D) Engender
E) Essential
178. Match the definition to the word.
the person who had your job before you
A) Override
B) Monitor
C) Processor
D) Commensurate
E) Predecessor
179. Match the definition to the word.
the process of putting a decision or plan into effect
A) Formulas
B) Implementation
C) Leverage
D) Delivery
E) Subsidizing
180. Match the definition to the word.
rapidity of move or action
A) Arithmetic
B) Inefficiency
C) Speed
D) Lateral
E) Expand
181. Choose the correct adverbial clause of time.
_____these sensor systems require computer technology, their implementation _____ not reliable
A) While, as
B) As soon as, as
C) Before, are
D) After, since
E) Until, is
182. Choose the correct variant.
Computer will help us as an electronic device _____ it can receive a set of instructions called program
A) in spite of
B) when
C) while
D) until
E) though
183. Complete the sentences using first conditional.
If there _____ a problem, _____ the customer services
A) are, consult
B) are, consulted
C) will be, consults

D) is, consult
E) is, will consult,

184. Choose the correct variant.

Digital computers _____ generally more effective _____ they are faster

A) is, whence
B) is, as
C) are, unless
D) are, though
E) are, when

185. Choose the correct variant.

Computers _____ opened up a new era in manufacturing _____ they were invented

A) have, since
B) have, before
C) has, though
D) has, till
E) have, unless

186. Complete the sentences using first conditional.

If it _____, only computer and maintenance engineers _____ to repair it

A) failed, is required
B) fails, are required
C) fails, were required
D) fails, was required
E) failed, are required

187. Complete the sentences using first conditional.

If they _____, they are the ones who _____ the automation engineers and technicians of tomorrow

A) Could be attracted, will be
B) Could attract, will be
C) Can be attracted, will be
D) Can be attract, would be
E) Can be attracted, would be

188. Choose the correct variant.

The computers _____ an increasing role in all branches of the economy _____ they were invented and improved

A) played, until
B) were played, while
C) played, though
D) have been playing, since
E) have played, as

189. Choose the correct adverbial clause of time.

_____ the improvements were made, programming languages ____harder to use

A) When, is
B) After, are
C) When, are
D) Before, were
E) Before, is

190. Choose the correct adverbial clause of time.

_____ the improvements had been made in program storage technology, they _____ the programming commands

A) As soon as, contained
B) Till, are contained
C) After, was contained
D) While, is contained
E) Before, are contained

191. Choose correct variant.
If we____ the significant features of cloud computing, we____ it perfectly
A) discussed, have understood
B) have discussed, understood
C) would discuss, would understand
D) will discuss, understand
E) discuss, will understand
192. Choose correct variant.
_____ we learn computer science, we _____ be talented computer engineers
A) Unless, would
B) If, would
C) If, should
D) If, shall
E) Unless, will
193. Choose correct variant.
_____ you know the theory of information technology, you _____ pass the exam
A) If, would
B) If, won't
C) Unless, will be
D) If, shall
E) Unless, won't
194. Choose the correct adverbial clause of time.
_____ the advances had been made in computer technology, new computer generations _____
A) Before, appear
B) After, appeared
C) After, will appear
D) When, are appeared
E) Before, will appear
195. Choose the correct adverbial clause of time.
_____ the high-speed digital computers accomplish the processing of enormous amounts of data, the new advances _____ in computer technology
A) Until, is happened
B) As soon as, happened
C) Till, will happen
D) While, happened
E) When, are happened
196. Choose the correct adverbial clause of time.
_____ the improvements happened in program storage technology, its work _____ much easier
A) Before, become
B) When, will become
C) Since, become
D) As, will become
E) When, became
197. Complete the sentences using first conditional.
If people _____ that they can make money from the Internet, they _____ the commercial use of this network
A) See, would increase
B) See, increase
C) Saw, will increase
D) See, will increase
E) Will see, will increase
198. Complete the sentences using second conditional.
If the internet _____, workers _____ send and receive e-mails without leaving their desks and their desktop computers

A) Don't exist, could
B) Didn't existed, couldn't
C) Didn't exist, couldn't
D) Didn't exist, could
E) Don't exist, can

199. Complete the sentences using second conditional.

If a number of significant developments in various fields of information _____ in the 20th century, the electronic digital computer _____

A) didn't occur, would appear
B) occur, wouldn't appear
C) didn't occur, will appear
D) occurred, appeared
E) didn't occur, wouldn't appear

200. Complete the sentences using first conditional.

If artificial intelligence _____ an advanced field of computer science now, it _____ about numerous positive changes in society

A) Is, bring
B) Are, will bring
C) Is, will bring
D) Will, will bring
E) Is, brought

201. Make up a sentence.

1) creates
2) automation
3) for society
4) material value
5) a wealth of
6) of production
7) as well

A) 6,1,7,5,2,4,3
B) 2,1,6,3,5,7,4
C) 3,1,2,4,6,5,7
D) 4,3,1,7,6,2,5
E) 2,6,1,5,4,3,7

202. Make up a sentence.

1) hazardous conditions
2) to handle
3) production line
4) deploying robots
5) safer for
6) makes
7) the employee

A) 4,2,6,1,7,5,3
B) 4,2,6,1,3,5,7
C) 2,1,6,7,3,5,4
D) 4,2,1,6,3,5,7
E) 1,6,4,2,3,5,7

203. Make up a sentence.

1) has recently
2 acceptance
3) industrial automation
4) more and more
5)found
6) from various

7) industries
A) 7, 2,5,4,6,3,1
B) 6,1,7,4,5,3,2
C) 5,2,1,6,3,4,7
D) 4,2,5,7,3,1,6
E) 3,1,5,4,2,6,7
204. Make up sentence.
1) by the rapid
2)the manufacturing
3) adoption of
4) automation
5) industry
6) has been driven
7) technologies
A) 2,7,6,1,4,3,5
B) 2,5,6,1,3,4,7
C) 2,4,1,7,3,5,6
D) 3,1,5,6,2,7,4
E) 2,4,6,7,3,1,5
205. Make up a sentence.
1) drive
2) will be
3) with less
4) the continuing
5) more
6) to make
7) manufacturing
A) 4,7,1,2,6,5,3
B) 3,5,6,2,7,1,4
C) 6,5,3,1,4,2,7
D) 7,1,4,6,5,2,3
E) 2,7,3,5,6,1,4
206. Make up a sentence.
1) companies
2) require
3) for smaller
4) investment
5) financial
6) how much
7) do robots ?
A) 6,5,4,1,2,3,7
B) 6,5,4,7,2,3,1
C) 2,3,6,5,1,4,7
D) 1,3,7,4,2,6,5
E) 7,4,1,2,3,6,5
207. Make up a sentence.
1) them
2) than
3) rather
4) will work
5) replace
6) with people
7) the robots
A) 7,6,2,4,3,5,1

B) 1,2,3,4,7,6,5
C) 7,4,6,3,2,5,1
D) 3,1,2,7,6,4,5
E) 3,2,1,4,7,6,5

208. Make up sentence.
1) automation
2) redundancy
3) with
4) must function
5) high
6) future
7) systems
A) 4,3,5,2,1,7,6
B) 4,3,5,2,6,1,7
C) 3,5,2,6,4,1,7
D) 6,1,7,4,3,5,2
E) 6,3,5,7,4,1,2

209. Make up a sentence.
1) fade away
2) probably
3) conventional
4) architectures
5) control
6) deterministic
7) will
A) 5,4,7, 2,3,6,1
B) 3,6,1,2,7,4,5
C) 1,2,3,6,5,4,7
D) 7,4,5,6,3,2,1
E) 3,6,5,4,7,2,1

210. Make up a sentence.
1) of the scientific
2) what
3) progress
4) is the proof
5) and technological
6) in
7) the world?
A) 5,6,7,1,4,3,2
B) 4,2,1,5,3,6,7
C) 5,3,4,2,1,6,7
D) 2,4,1,5,3,6,7
E) 6,7,5,3,4,1,2

211. Make up a sentence.
1) is now stored
2) in computer
3) individuals
4) information
5) much personal
6) about
7) files
A) 5,4,6,3,1,2,7
B) 7,2,5,4,6,3,1
C) 5,2,1,4,6,3,7

D) 7,2,1,3,5,4,6
E) 1,2,7,4,6,3,5

212. Make up a sentence.
1) each
2) a specific
3) person
4) aspect of
5) object there
6) the total
7) focuses on
A) 1,6,5,2,3,7,4
B) 1,3,7,2,4,6,5
C) 1,2,4,6,5,3,7
D) 1,2,3,6,4,7,5
E) 7,2,4,5,6 ,1,3

213. Make up a sentence.
1) reflection
2) and runtime code
3) the Java runtime
4) provides
5) such as
6) capabilities
7) dynamic
A) 1,5,6,2,3,4,7
B) 3,4,7,6,5,1,2
C) 3,2,1,6,5,4,7
D) 3,4,7,1,2,6,5
E) 1,2,3,4,5,7,6

214. Make up a sentence
1) James Gosling
2) developed
3) Java
4) by
5) at
6) was originally
7) SunMicrosystems.
A) 5,7,4,1,2,3,6
B) 3,6,2,4,1,5,7
C) 1,5,7,2,4,3,6
D) 4,1,2,3,6,5,7
E) 3,6,5,7,2,4,1

215. Make up a sentence.
1) language
2) name
3) better
4) the programming
5) had
6) differently
7) the programmer
A) 4,1,7,6,5,3,2
B) 7,5,3,2,4,1,6
C) 6,5,3,4,1,7,2
D) 6,5,2,3,4,1,7
E) 5,3,4,2,6,1,7

216. Make up a sentence.
1) for a computer
2) system
3) than
4) more expensive
5) the hardware
6) the software
7) is often
A) 6,1,2,7,4,3,5
B) 2,4,7,3,1,6,5
C) 3,5,6,2,4,1,7
D) 4,6,3,1,7,2,5
E) 7,2,4,3,5,6,1
217. Make up a sentence..
1) on computer files
2) the smallest
3) keep
4) accounts
5) their
6) all
7) banks
A) 2,7,6,3,5,4,1
B) 6,3,5,2,7,4,1
C) 6,2,7,3,5,4,1
D) 6,3,5,2,1,4,7
E) 4,3,5,1,6,2,7
218. Make up a sentence.
1) use
2) cyber-crimes
3) any person
4) or cheat
5) can
6) to threaten
7) someone
A) 2,6,4,5,1,7,3
B) 2,1,3,4,5,6 ,7
C) 3,5,1,2,6,4,7
D) 6,3,5,1,7,2,4
E) 4,5,7,2,3,6,1
219. Make up a sentence.
1) operating costs
2) help
3) services
4) the cloud
5) you
6) lower
7) your
A) 6,1,5,7,4,2,3
B) 2,5,7,1,3,6,4
C) 7,3,5,6,4,2,1
D) 6,5,3,7,1,2,4
E) 4,3,2,5,6,7,1
220. Make up a sentence.
1) computing

2) rely on
3) resources
4) cloud
5) does
6) Why
7) sharing of ?
A) 6,2,1,4,3,7,5
B) 4,6,2,3,1,5,7
C) 2,6,5,4,1,3,7
D) 7,3,4,2,1,5,6
E) 6,5,4,1,2,7,3

221. Choose the correct tense form.
A PAS is often _____ on open standards in contrast to a <u>distributed control system</u>
A) based
B) basing
C) bases
D) base
E) being based

222. Choose the correct tense form.
The employees _____ the production equipment at the moment
A) has been run
B) are running
C) was running
D) is running
E) running

223. Choose the correct tense form.
Process automation _____ using computer technology and software engineering
A) involves
B) is involved
C) involving
D) have been involved
E) are involved

224. Choose the correct tense form.
After inventing analog computer the engineers _____ to invent digital computer
A) decide
B) is decided
C) is being decided
D) decided
E) to decide

225. Choose the correct tense form.
Machine vision _____ the processing of enormous amounts of data
A) is being required
B) requires
C) were required
D) are required
E) have been required

226. Choose the correct tense form.
Great advances _____ in computer technology recently
A) is happened
B) have been happened
C) has happened
D) have happened
E) has happened

227. Choose the correct tense form.

The term computer usually _____ to high-speed digital computers as the former type _____ problems by using continuously changing data

A) is referring, is solving
B) refers, solved
C) is refers, solves
D) is referred, solved
E) referred, solves

228. Choose the correct tense form.

These computers _____ an increasing role in all branches of the economy because they _____ the life more comfortable

A) played, made
B) play, make
C) is played, made
D) has played, have made
E) played, was made

229. Choose the correct tense form.

The real power of a computer _____ on the speed because it _____ switches with it

A) was depended, checks
B) will be depended, checked
C) depends, checks
D) depends, is checked
E) is depends, checks

230. Choose the correct tense form.

The program _____ the sequence of values for the inputs of the various feedback control loops that make up the automated system

A) is establishes
B) establishes
C) are established
D) establishing
E) is been established

231. Choose the correct tense form.

The engineers _____ into consideration the cost of equipment, installation, maintenance and repairs

A) is taken
B) would be taken
C) have taken
D) has taken
E) was taken

232. Choose the correct tense form.

Some manual labor tasks _____ hazardous materials lately

A) has involved
B) had been involved
C) have involved
D) had involved
E) was involved

233. Choose the correct tense form.

Human labor _____ many inventions up to now

A) are made
B) have made
C) is been made
D) has made
E) will be made

234. Choose the correct tense form.

He _____ computer storage technology as the means for storing the programmed commands by the end of the month

A) was used
B) were used
C) would have used
D) will have used
E) used

235. Choose the correct tense form.
The program _____ what the automated system should do
A) is specified
B) specifies
C) specified
D) have been specified
E) was specified

236. Choose the correct tense form.
The factories that make smaller quantities of highly specialized products _____ robots
A) is using
B) would be used
C) are used
D) use
E) used

237. Choose the correct tense form.
Till the high-speed digital computers _____ the processing of enormous amounts of data, the new advances will happen in computer technology
A) is accomplished
B) accomplish
C) were accomplish
D) was accomplish
E) is being accomplish

238. Choose the correct tense form.
Scientists _____ the laws of the universe
A) was investigated
B) have been investigated
C) are investigated
D) investigate
E) is investigated

239. Choose the correct tense form.
Now we live in the information era when the computer network _____ the globe
A) have embraced
B) to embrace
C) will embrace
D) embraces
E) is embraced

240. Choose the correct tense form
Everything that a digital computer _____ is based on one operation
A) have done
B) did
C) is done
D) does
E) do

241. Choose the correct adjective or adverb.
Factory owners want their equipment to deliver the_____ output with as little production cost as possible
A) higher
B) highest
C) as high as

D) the most highest
E) the most high

242. Choose the correct adjective or adverb.
The operators work _____ of all in the plant
A) most
B) more
C) the best most
D) more higher
E) the much most

243. Choose the correct adjective or adverb.
They deliver petrochemicals _____ than the workers
A) the most quickly
B) as quickly as
C) more quickly
D) more quicklier
E) quickly

244. Choose the correct adjective or adverb.
Robots can work _____ of all at the plant
A) much the most
B) most
C) more
D) much
E) much more

245. Choose the correct adjective or adverb.
The software and controls regulate equipment _____ of all
A) best
B) as good as
C) the most good
D) as better
E) better

246. Choose the correct adjective or adverb.
Automated work is _____ than manual work
A) faster
B) more fast
C) more faster
D) as fast as
E) the fastest

247. Choose the correct adjective or adverb.
Automation is _____ than manual work for the productivity of the company
A) better
B) better good
C) more better
D) good
E) the best

248. Choose the correct adjective or adverb.
Mechanization is _____ than automation
A) more older
B) much more old
C) as old as
D) older
E) more old

249. Choose the correct adjective or adverb.
Robots are the _____ of all
A) quickest

B) better
C) quick
D) most quickest
E) most quick

250. Choose the correct adjective or adverb.
Information technology is the _____ achievement of the mankind
A) late
B) most latest
C) most late
D) later
E) latest

251. Choose the correct adjective or adverb.
A human production line is _____ than an automatic production line
A) slower
B) more slow
C) slow
D) more slower
E) as slow as

252. Choose the correct adjective or adverb.
These obstacles are _____ the previous ones
A) as bad as
B) as bad
C) more bad
D) as worse as
E) as worst as

253. Choose the correct adjective or adverb.
Robots doing any task makes the manufacturing process _____ than human work
A) as flexible as
B) flexibler
C) more flexibler
D) more flexible
E) flexible

254. Choose the correct adjective or adverb.
It also contributes construction materials operate _____ and safely
A) more efficiently
B) the best efficient
C) more efficient
D) as efficiently as
E) most efficiently

255. Choose the correct adjective or adverb.
The continuing manufacturing drive will be to make more with _____
A) less little
B) less
C) little
D) as little as
E) least

256. Choose the correct adjective or adverb.
The associated calculations are executed _____ than previously possible calculations
A) much faster
B) more fast
C) more faster
D) fastest
E) fast

257. Choose the correct adjective or adverb.

They are generally _____ than analogue computers for four principal reasons
A) as effective as
B) more effective
C) effectiver
D) more effectiver
E) effective
258. Choose the correct adjective or adverb.
Great Britain is the _____ industrial country
A) most highliest developed
B) high developed
C) highliest developed
D) most highly developed
E) most high developed
259. Choose the correct adjective or adverb.
Their aim is to determine _____ settings on which to run the production equipment
A) the better
B) the most good
C) the most
D) the best good
E) the best
260. Choose the correct adjective or adverb.
Cyber-crimes emerged to be one of the _____ weapon
A) lethal revengeful
B) the most lethalest revengeful
C) as lethal revengeful
D) most lethal revengeful
E) best lethal revengeful
XIV. Logical Ending.
261. Choose the correct logical ending.
< br> Industries implement automation _____
A) handles different processes and machineries in the industry
B) to increase productivity
C) to decrease quality in the manufacturing process
D) increases the cost associated with human operators
E) to decrease flexibility in the manufacturing process
262. Choose the correct logical ending.
< br> Adding a new task in the assembly line requires_____
A) leads to a significant improvement in the productivity of the company
B) improve data accuracy
C) training with a human operator
D) manufacturing process is more flexible.
E) reduce your data collection costs
263. Choose the correct logical ending.
< br> Process automation involves using computer technology and software engineering_____
A) to achieve the minimum production
B) that collects data on temperatures, pressures, flows and so on
C) to help power plants and factories in industries
D) physically monitor performances values
E) operate more efficiently and safely
264. Choose the correct logical ending.
< br> The software and controls regulate equipment to run at the optimum speed that requires _____
A) none energy

B) the more energy
C) the most energy
D) the least energy
E) not energy

265. Choose the correct logical ending.
< br> The driver must permanently monitor the system and be prepared_____
A) designed to be automated from the outset
B) the complexity or rapidity of the process
C) to take over control at any time
D) the system takes over longitudinal and lateral control
E) includes automation of control operations

266. Choose the correct logical ending.
< br> Integrated automation of production _____
A) excludes all of the basic functions of the enterprise
B) don't contain all of the basic functions of the enterprise
C) leave out all of the basic functions of the enterprise
D) doesn't encompasses all of the basic functions of the enterprise
E) encompasses all of the basic functions of the enterprise

267. Choose the correct logical ending.
< br> Total automation focuses on the continuous_____
A) hazardous to human health or life
B) enable by a combination of process
C) improvement of execution efficiency and outcomes
D) remain practically unchanged
E) means the control and monitoring

268. Choose the correct logical ending.
< br> In the process of total automation of production possible deviations _____
A) is also used in inaccessible situations
B) can be taken into account beforehand
C) means the control and monitoring of complex automated production
D) to be automated is practicable and stable
E) holistic managerial approach to the entire process automation strategy of an enterprise

269. Choose the correct logical ending.
< br> The more complex the task, the more difficult _____
A) of human workers by automations
B) may be dangerous
C) but also to devise and design new and more sophisticated equipment
D) it is to automate
E) with a high degree of precision and consistency

270. Choose the correct logical ending.
< br> Machines can perform the same task repeatedly without _____
A) more complex and meaningful
B) automation should be scalable
C) getting tired or making mistakes
D) include the cost of equipment, installation, maintenance, and repairs
E) acquires new qualitative nuances

271. Choose the correct logical ending.
< br> The controller would know the past state of the system output with____
A) is being measured and compared to the input
B) might be a manufacturing operation
C) also called a feedback system
D) the help of the feedback signal
E) transferred from the output to the controller

272. Choose the correct logical ending.
< br> The input to the system is the reference value or_____
A) are the measuring devices
B) is to remove the measured disturbances
C) set point, for the system output
D) communicate with the other elements in the control system
E) being controlled is the heater
273. Choose the correct logical ending.
< br> When the temperature of the strip is raised, _____
A) of two metal strips joined along their lengths
B) it flexes in direct proportion to the temperature change
C) is normally accomplished using a bimetallic strip
D) the process being controlled is the heater
E) used in feedback control systems for automation
274. Choose the correct logical ending.
< br> The switch is the controller and_____
A) actuating device for the heating system
B) is the room temperature
C) are usually designed specifically for the system
D) to the bimetallic strip of the thermostat
E) the heat is turned of
275. Choose the correct logical ending.
< br> When the temperature exceeds the set point, the heat_____
A) is turned off
B) are accomplished to influence the output variable
C) with the reference input value
D) to influence the output variable
E) connected to the bimetallic strip of the thermostat
276. Choose the correct logical ending.
< br> An automated system is designed_____
A) reduce the occurrence of outages
B) to accomplish some useful action
C) automation relies on substation integration
D) be readily converted into other types of power
E) that action requires power
277. Choose the correct logical ending.
< br>Electrical power is the most versatile, because it_____
A) are often used interchangeably
B) reduce the occurrence
C) can be readily generated from other sources
D) are fossil fuel, hydroelectric, solar and nuclear
E) the act of automatically controlling the power system
278. Choose the correct logical ending.
< br> At each processing location, accurate_____
A) positioning of the product is generally required
B) action performed by automated systems are generally of two types
C) also refer to the delivery of information
D) perform work on a product
E) entity include the metal, plastic, electrical signals, or data
279. Choose the correct logical ending.
< br> Machine programming is the process of_____
A) writing instructions for a computer in machine language
B) variations in raw materials

C) to be altered in relatively sophisticated systems
D) detail in each command could be significantly greater
E) various components must function in order to accomplish the desired result

280. Choose the correct logical ending.

< br> The feedback control system is used _____

A) be unable to exert sufficient control over the quality of the process output
B) be unable to exert sufficient control over the quality of the process output
C) often capable of making decisions during their operation
D) to verify that the move has been correctly made
E) the program can be readily changed or improved

XV. Phrasal Verbs.

281. Choose the correct phrasal verb.

The modern scientific revolution _____ unprecedented opportunities for mankind

A) opens from
B) finds from
C) opens out
D) finds up
E) opens up

282. Choose the correct phrasal verb.

The optimum utilization of opportunities_____ economic development

A) turns down
B) comes through
C) speeds up
D) goes away
E) finds from

283. Choose the correct phrasal verb.

Automation of production does not only_____ maximum savings

A) bring about
B) look at
C) give up
D) draw back
E) bring up

284. Choose the correct phrasal verb.

Automation of production gradually_____ full employment

A) looks for
B) wipes out
C) looks around
D) turn to
E) finds up

285. Choose the correct phrasal verb.

Maintenance_____ at set intervals by the operators nowadays

A) is carried out
B) is fixed up
C) is turned up
D) is given up
E) is made out

286. Choose the correct phrasal verb.

This software_____ the response time to changing conditions

A) gives up
B) turns out
C) carry out
D) goes out
E) speeds up

287. Choose the correct phrasal verb.

These producing products_____ to be defective at the plant
A) go down
B) turn out
C) look around
D) go out
E) make out

288. Choose the correct phrasal verb.
The driver must permanently_____ control at the work place
A) look through
B) take over
C) be over
D) go through
E) come down

289. Choose the correct phrasal verb.
This type of automation also _____ greater levels of automated business
A) comes on
B) goes on
C) turns to
D) depend on
E) focuses on

290. Choose the correct phrasal verb.
A feedback system _____ the output into the input last month
A) gave in
B) fed back
C) gave up
D) came back
E) went back

291. Choose the correct phrasal verb
Two metal strips _____ their lengths in this device
A) go up
B) find out
C) join along
D) go out
E) carry out

292. Choose the correct phrasal verb
When the output is below the set point, the switch _____ the heater
A) turn down
B) turns on
C) go up
D) come up
E) turn to

293. Choose the correct phrasal verb
When the temperature exceeds the set point, the heat is _____
A) go off
B) turned off
C) found out
D) brought up
E) made out

294. Choose the correct phrasal verb
The full substation automation _____ substation integration nowadays
A) arrives at
B) turns on
C) goes on
D) depend on

E) relies on

295. Choose the correct phrasal verb

The various feedback control loops _____ the automated system now

A) make up
B) come down
C) go up
D) lay down
E) lay up

296. Choose the correct phrasal verb

The programmed step has been _____ according to the feedback loop

A) brought out
B) found out
C) told out
D) carried out
E) made out

297. Choose the correct phrasal verb.

Variations in the raw materials were _____ a production process

A) opened into
B) turned into
C) closed into
D) fed into
E) gone into

298. Choose the correct phrasal verb.

They will have _____ with the Internet, smartphones and video games

A) grown up
B) found up
C) turned up
D) come up
E) closed up

299. Choose the correct phrasal verb.

The next generation of robots will be _____ easily in several years

A) driven up
B) found up
C) worked up
D) set up
E) told up

300. Choose the correct phrasal verb.

Conventional deterministic control architectures will probably _____

A) make out
B) speak away
C) work out
D) speak out
E) fade away
